Table of Contents

List of Figures **iv**

List of Tables **v**

Acronyms **vi**

1 Introduction **1**

1.1 Historical overview on scheduling 1

1.2 Problem introduction and purpose of this thesis 3

1.2.1 The linear programming approach in solving scheduling problems 5

1.2.2 General solvers vs ad-hoc algorithms 5

1.2.3 Current status of research on the topic and my contribution . . . 5

1.3 Comments 5

2 Theoretical Fundamentals **6**

2.1 Computational complexity, P vs NP 6

2.2 Scheduling problems classification 6

2.3 Objective Function: LP vs MILP implications 6

2.4 Linear programming, constraints definition and linearization techniques 6

2.5 Heuristic and Metaheuristic: why and how 6

3 Problems definition **7**

3.1 AOPSP 7

3.1.1 Complexity 7

3.1.2 Classification: machines and jobs characteristics 7

3.1.3 Considerations on dimension of instances to face 7

3.1.4 Similarity and differences with known problems 7

3.1.5 Metrics considered 7

3.2 IAOPORSP 7

3.2.1 Complexity 7

3.2.2 Classification: machines and jobs characteristics 7
3.2.3 Considerations on dimension of instances to face 7
3.2.4 Similarity and differences with known problems 7
3.2.5 Metrics considered 7

4 LP modeling **8**
4.1 Preface 8
4.2 Time-based model for the AOPSP 9
4.2.1 DVs and parameters 9
4.2.2 Model formulation 10
4.2.3 Model overview 11
4.3 Time-based model for the IAOPORSP 12
4.3.1 DVs and parameters 12
4.3.2 Model formulation 13
4.3.3 Model overview 14
4.4 Assignment-based model for the IAOPORSP 15
4.4.1 DVs and parameters 15
4.4.2 Model formulation 16
4.4.3 Model overview 17

5 Methodology and algorithms **18**
5.1 Algorithms for AOPSP 18
5.1.1 Forward greedy 18
5.1.2 Backward greedy 18
5.1.3 Modified B&B 18
5.2 Algorithms for IAOPORSP 18
5.2.1 Forward greedy 18
5.2.2 Neighborhoods definition 18
5.2.3 Adaptive neighborhood local Search 18

6 Validation and results **19**
6.1 Considerations from failed attempts 19
6.2 Validation 19
6.2.1 Classification of data: real and generalized instances generation . 19
6.2.2 Performance vs dimension of the problem, considerations 19
6.3 Results obtained 19
6.3.1 Models and algorithms selected for validation 19
6.3.2 Objective function results 19

6.3.3 Computation time results 19
6.3.4 Considerations on results 19

7 Conclusions and future work **20**
7.1 Conclusions 20
7.2 Future work 20
